

Community Assistance 2015-2016 Annual Report to WAICC

The assistance made available through the provision of School Supplies, funding for School Food Programs, and financial assistance through Special Needs/Emergency Relief addresses critical needs for families and individuals who live in our local communities.

The School Food Programs and the School Supplies Program are well utilized, and are appreciated by the school staff as well as the families of students who benefit from them. A more detailed report on the School Supplies Program is available for review.

Providing financial assistance to individuals and families who have insufficient money to cover daily necessities, let alone urgent or emergency expenses, makes a tremendous difference in their lives. This program works very well; individuals with special or emergency needs are being identified through social programs volunteers at the Food Bank or staff at WAICC member churches, and those receiving help are without exception extremely grateful.

On behalf of the many people in our local communities who benefit from the compassion and generosity of WAICC, thank you for doing your part to make these programs possible. They provide not only money, but through kindness give hope to those who are vulnerable and are experiencing great personal difficulty.

Respectfully submitted,

Diana Shelley
